

**FOUNDATION TIER
MINI PRACTICE EXAM 2**

**CALCULATOR ALLOWED
20 MINUTES ALLOWED**

1.
The below bar chart shows the number of pies sold at a market on Monday to Friday in Week 1.

(a) How many more pies were sold on Tuesday than on Monday?

$$31 - 23 = 8$$

(1)

(b) There were 146 pies sold in total from Monday to Friday in Week 1.
Use this information to complete the bar chart.

$$146 - 23 - 31 - 35 - 28 = 29$$

(2)

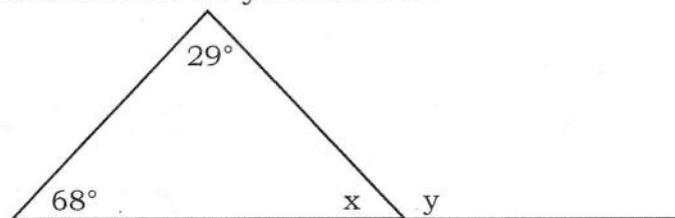

(c) In Week 2, 34 pies were sold on average each day.
In which week were more pies sold - Week 1 or Week 2?

$$34 \times 5 = 170$$

Week 2

(2)

2.
Find x and y . Give reasons for your answer.

$$\begin{aligned} 68 + 29 &= 97 \\ 180 - 97 &= 83 \\ 180 - 83 &= 97 \end{aligned}$$

$x = 83^\circ$ because angles in a triangle add to 180° .
 $y = 97^\circ$ because angles on a straight line add to 180° .

(3)

3.

Find the mean, mode, median and range of the following numbers:

12 16 11 11 9 8 18

$$\text{mean} = (12 + 16 + 11 + 11 + 9 + 8 + 18) \div 7 = 12.142857$$

$$\text{mode} = 11$$

$$\text{median} = 8, 9, 11, 11, 12, 16, 18 = 11$$

$$\text{range} = 18 - 8 = 10$$

(4)

4.

Janice works for a supermarket.

She earns £7.50 for each hour she works.

On Sunday, she earns a 10% bonus for each hour she works.

Last week, Janice worked 8-hour shifts on Monday, Wednesday and Friday. She also worked 6 hours on Sunday.

Work out Janice's pay from last week.

$$7.50 \times 24 = \text{£}180$$

$$10\% \text{ of } 7.50 = 0.75$$

$$7.50 + 0.75 = 8.25$$

$$8.25 \times 6 = \text{£}49.50$$

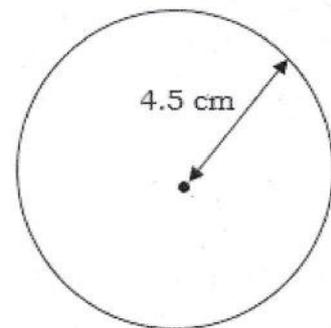

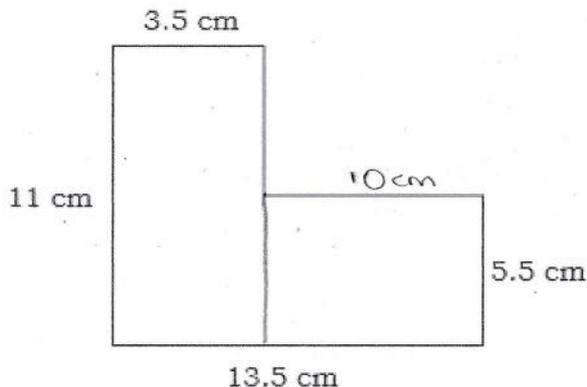

$$180 + 49.50$$

$$= \underline{\underline{\text{£}229.50}}$$

(3)

5.

Work out the total area of the two below shapes, to the nearest square centimetre.

$$3.5 \times 11 = 38.5$$

$$5.5 \times 10 = 55$$

$$38.5 + 55 = 93.5 \text{ cm}^2$$

$$\pi \times 4.5^2 =$$

$$63.61725... \text{ cm}^2$$

$$93.5 + 63.61725... = 157.11...$$

$$= \underline{\underline{157 \text{ cm}^2}}$$

(5)
